

### ABOUT OPERATION LIFESAVER:

OPERATION LIFESAVER IS A MISSION DRIVEN RAIL SAFETY EDUCATION NON-PROFIT POWERED BY DEDICATED PEOPLE. OUR GOAL IS TO END COLLISIONS, DEATHS AND INJURIES ON AND AROUND RAILROAD TRACKS AND TRAINS.

- Free in-person and virtual safety presentations across the U.S.
- eLearning programs for professional drivers, first responders and school bus drivers.
- Visit [oli.org](http://oli.org) to schedule a presentation, find safety materials, become a volunteer and share public awareness campaigns, videos and more.

### HELP STOP TRACK TRAGEDIES

Know the facts.  
Make good decisions.  
Share the message.

# STAY SAFE.

## KNOW THE FACTS.

WHAT PROFESSIONAL DRIVERS NEED TO KNOW ABOUT RAILROAD CROSSINGS

### KNOW THE FACTS:

IN THE U.S., A PERSON OR VEHICLE IS HIT BY A TRAIN EVERY 3 HOURS.

TRAINS ARE QUIETER AND FASTER THAN YOU THINK — **ONLY TRAINS BELONG ON THE TRACKS.**

### MAKE SAFE CHOICES:

#### CROSS LEGALLY AND SAFELY

The only safe and legal place for anyone to cross railroad tracks is at designated crossings. Always obey warning signs and signals. Always look for a train before proceeding.

#### WAIT, LOOK BOTH WAYS

Always expect a train. Trains may be closer and traveling faster than they appear and can run on any track at any time. Multiple tracks may mean multiple trains. **Ensure you can clearly see down the tracks in both directions before proceeding.** AVOID crossing while lights are flashing or gates are down. Never try to beat a train.

THE AVERAGE FREIGHT TRAIN TRAVELING 55 MILES PER HOUR CAN TAKE A MILE OR MORE TO STOP — THE LENGTH OF 18 FOOTBALL FIELDS.

SEE TRACKS?  
THINK TRAIN!

#### AVOID GETTING STUCK

Before crossing, be sure there is space on the other side to completely clear the tracks. Trains overhang tracks. **When driving leave at least 15 feet between the front and rear of your vehicle and the nearest rail.** Avoid shifting gears while crossing.

#### GET OUT! GET AWAY! FIND THE BLUE AND WHITE SIGN

If your vehicle gets stuck or stalls at a crossing, get everyone out and far away immediately, even if you do not see a train. Call the number on the Blue and White Emergency Notification System (ENS) sign and share the crossing ID number with the dispatcher. No sign? Dial 911.

## KNOW THE SIGNS AND SIGNALS

### MULTIPLE TRACKS

Multiple tracks are present. Multiple tracks may mean multiple trains. Wait until you can see clearly down the tracks in both directions before proceeding.

### LOWERING GATES AND FLASHING RED LIGHTS

A train is approaching (even if you don't see it yet). Do not proceed until lights turn off and gates go up. It is illegal and dangerous to go around lowered gates.

### CROSSBUCK

YIELD if a train is approaching. Trains always have the right-of-way.

### FLASHING RED LIGHTS

STOP when flashing. DO NOT proceed until lights stop flashing. If lights begin flashing after you start across the tracks, keep going.

### EMERGENCY NOTIFICATION SYSTEM (ENS)

This is the first phone number to call if a vehicle is stuck or stalls on the tracks. NOTE: Each sign has a different phone number and location ID number.

Also use the ENS to report people, vehicles or debris on the tracks, damaged signs or signals and obstructed views.

### PAVEMENT MARKINGS

RxR and a wide white line on the roadway mean you are approaching a railroad crossing. Stay behind the white stop line while waiting for a train to pass. No stop line? Stop at least 15 feet from the nearest rail.

### LOW GROUND CLEARANCE CROSSING

Raised crossing ahead. If you drive anything low to the ground — like a lowboy, bus, truck, sports car or trailer — you are at risk of getting hung up on the tracks. Do not proceed until you know your vehicle will clear the tracks.

### ADVANCE WARNING

Slow down, look, listen and be prepared to stop. Typically, this is the first sign you see when approaching a railroad crossing.

## PROFESSIONAL DRIVERS

## HAVE CRITICAL DECISIONS

## TO MAKE AT EVERY TURN.

IF A ROUTE INCLUDES RAILROAD CROSSINGS, IT'S IMPORTANT TO KNOW WHAT TO DO WHEN YOU SEE RAILROAD SIGNS AND SIGNALS.

### PLAN AHEAD

Know your route and be aware of where railroad crossings exist. Be prepared to look and listen for a train.

### KNOW YOUR TRUCK SIZE

- If your vehicle won't fit, don't commit! Before crossing, be sure there is space to completely clear the tracks. Trains overhang tracks. When driving leave at least 15 feet between the front and rear of your vehicle and the nearest rail. Never stop on tracks.
- Use the highest gear which will let you cross the tracks without shifting.
- Track heights vary. If you drive a low clearance vehicle, be aware of raised crossings.

## STEPS TO SAFELY CROSS RAILROAD TRACKS

- 1 Eliminate all distractions. Turn off noisy fans and radios. Look and listen for a train.
- 2 Stop no closer than 15 feet and no farther than 50 feet from the crossing.
- 3 Look carefully in both directions for approaching trains twice before crossing. If necessary, look around visual obstructions. If your view is obstructed, do not attempt to cross.
- 4 Know the law. Trucks carrying hazardous materials are required to STOP at all crossings unless there is an exempt sign posted at the crossing.
- 5 Once you begin crossing the tracks, do not hesitate. Cross without stopping. If stuck or stalled on the tracks, evacuate immediately and call the number on the Blue and White sign. Give the crossing identification number so the railroad knows your location.

Note: Refer to state and local laws and company policies for additional information.
